

Ear Infection

"I was looking for a miracle and that's what I received"

I'm writing to let you know after 5 months and only 2 bottles of your product, Katie's ear infection is gone. Her ears are clean, open & no odor. The best news is that she has also regained her hearing in the last two weeks!!! I was looking for a miracle and that's what I received. I was told she wouldn't get it back. Surgery was the only possibility. Not sure, if she would have gotten it back with that. Her other problem was the scratching and chewing. That is gone also. All her bare spots are gone and she doesn't scratch or chew. It's such a pleasure to her sleep so peaceful.

A couple of years ago she began having leakage. She was diagnosed with a loose bladder. She was put on phenylpropanolamine 50 mg twice a day. It did stop the leakage but since that time she drinks water constantly. Last year when she was seriously ill with the ear infection, the vet said to take her off the medicine for the time being until she got through the infection. To date, I haven't put her back on them...other than her drinking constantly; she has picked up an appetite that won't quit. She eats constantly...I will continue to give her your product. I'm telling everyone I know about it.

Thank you, Thank you, I can't tell you this enough.

Yeast Infection

"Maxi is becoming a new dog after only two weeks."

Fourteen year old Maxi has been a "mess" the three years I've known her. A Keeshond mix, Maxi has been living with a chronic yeast infection for almost thirteen years. **Her skin was hard, cracked and always weeping. Some areas were bleeding, some drained puss.** She had numerous holes in her skin and smelled – reeked! Of disease! **There were so many areas with no hair that people would back away from her.** Her ears were the worst, I think. She would shake them and fling puss and cry. Flushing and cleaning them caused such pain. Her nails were actually loose in their beds.

Two weeks ago we started her on NuVet. Today at her (grooming) appointment here is what we saw: She pranced in the door. There was a new coat of hair where

there had been "sick" skin. Her skin is pinker and smooth. Her nails are firm and hair covers every toe! It didn't hurt her to walk. No open sores or cracked skin. No drainage from her ears and no terrible smell. No drainage from her eyes. Maxi is becoming a new dog after only two weeks. Someday she will be beautiful again, thanks to NuVet.

Ear Infection

"My dog came alive after just a short period of time on these wonderful vitamins"

To whom it may concern;

I have a 7 year old Cavalier King Charles Spaniel named Abby. **Earlier this year we started allergy shots, she also has a lot of ear infections.** About 3 months ago the breeder told me about NuVet vitamins and how great they work. So I thought what the heck, I'll give them a try.

I just wanted to say, what a remarkable difference in her energy levels, I'm no longer giving her the allergy shots. My dog came alive after just a short period of time on these wonderful vitamins..... I can't thank you enough.

Sincerely,
Carol Baker
Livonia, MI

P.S. Abby thanks you too....since we just got a new puppy she needs all the energy she can get =)

Bladder & Kidney Infections

"We are very pleased thus far with the product and will continue the use of the product."

We have a 4 year old female Kuvasz named Sierra – **Sierra has been dealing with bladder and kidney infections since she was about 8 months old.** We have had ultrasounds done, numerous urinalyses and cultures, and tons of antibiotics to try to help Sierra. The antibiotics would clear the infection for awhile, but we were always back in the same boat - infection after infection. The vet even wanted to do some surgery to cut away the flap to the opening where bacteria maybe entering – of course this would only be experimental and of course cost us even more money.

Well after dealing with this for about 3 years now, I decided to look online and found your product. Skeptical at first, I thought 'What can it hurt?' and went along and ordered your product. **Well within in a week of giving Sierra the tablets, the blood in the urine has stopped and so has her moping around the house.**

We are very pleased thus far with the product and will continue the use of the product. I would recommend NuVet to all.

Thank you!

Ear Infection

"We love NuVet and we trust that wafer with our dog's life."

We got Kasey June '08. We rescued her from a family in San Jose who could no longer take care of her.

When we brought her home she was 25 lbs over weight but that was the only problem we had. She had no aggression problems and except for the mild arthritis she seemed fine.

In about four months she lost all the 25lbs and more. We were constantly at the vets because of ear infections. We were giving her pain medication daily because of her no longer mild arthritis. During the 6 months that we had her she started to lose all her fur and it was odd since it was December. She no longer ate her dry

food and she would sleep all the time. We could no longer take her to the dog park because she got too aggressive. We could not touch her because she would growl at us. She seemed moody all the time in addition she segregated herself to a room in the house.

We asked the vet if the symptoms (weight loss, ear infections, aggressions, severe arthritis and her being lethargic) were related to something more severe but the vet told us that she was allergic to something and that she wanted to have her tested, for an addition \$250 bill. She also told us that since she was a Rottweiler the aggression was par for the course and arthritis was caused by bad breeding.

We did not know what to do. We though she was surely going to die.

At the time I was studying dog nutrition and health and I soon realized that Kasey had all the symptoms of thyroid. We could not afford the \$200 per month medication that the vet wanted to give us; in addition there were too many side effects. I researched a natural vitamin that took care of the problem. That is when I came by the name NuVet.

Even though we were skeptical, because it seemed too good to be true, we tried it.

After three days that Kasey was taking the vitamins I could not believe my eyes. She was running around all happy and she ate all her food as if nothing was ever wrong. She no longer segregated herself and she wanted us to pet her and love on her.

What was most amazing to me was the fact that her ear infection cleared up in what seemed like overnight and her coat was show dog quality. After about two weeks we took her back to the dog park and to my surprise there were no dog fights, not even a growl.

Today Kasey is a happy go lucky 8 yr old and everyone cannot believe it because she looks so young and well taken care of. We have not been to the vet since November of '08. And now we have to be the ones that tell her to slow down. We love NuVet and we trust that wafer with our dog's life. Because of NuVet we know that Kasey will live a long happy life.

Infected Wound

"As lively and loving as ever a dog could be"

We found Miko (a 2yr old Boxer female) on the side of the road and assumed her for dead. We checked her and realized that she was unconscious. We immediately took her to our vet and he got to work on her right away. She had a huge infected wound on her head that went almost to the bone and both elbows were torn open and infested.

She was thoroughly cleaned and treated and she eventually woke up after 15hrs. She was terribly dehydrated, malnourished and could not even lift her head. We took her home and got her started on a proper diet supplemented by the NuVet Plus.

Three days into her recovery we saw a vast difference in her energy levels and mood. Her wounds were rapidly closing up and her bones were being covered up again.

It has now been two weeks since we took her home. The wounds are completely healed. She has recovered 60% of her ideal body weight. She is as lively and loving as ever a dog could be. We took her back to the vet for a checkup yesterday and he was shocked to see her in such a recovered state. He admitted that he did not think she would live through the 1st week.

Thanks to NuVet we now have a beautiful addition to our family.

Eye Infection

"After one dose I could see a change"

My seven month old basset Gus was becoming chronic with eye infection - seeing that the ophthalmic ointment provided by my dogs' vet was doing no appreciable good I turned to you for help. After only one dose I could see a change and I've doubled up, and after only one week it's yet another NuVet miracle - thank you so very much!!
